SUBJECT INDEX FOR VOLUME 11

A

Acclimation—
Effects of temperature and humidity in cattle, 50
Adaptation—
Of baby pigs to temperature, 118
Amino acids—
Lysine, methionine and fish solubles, supplement to a corn-degossypolized cottonseed meal ration for weanling pigs, 465
Methionine supplement to low-protein and urea rations for lambs, 572
Methionine supplement to soybean oil meal for weanling pigs, 459
Utilization of D-tryptophan, 712
Antibiotics—
Aureomycin concentrate, effect on unthrifty weanling pigs, 92
Aureomycin, streptomycin effect on growth and fattening of weanling pigs, 103
Aureomycin, streptomycin growth responses in 2-day-old pigs, 97
Aureomycin supplement to lamb fattening rations, 566
Bacitracin and aureomycin growing-fattening pigs, 84
Effect on growth of baby pigs, 449
Effect on growth of swine when fed different levels of protein, 455
Feed supplement containing aureomycin and B_{12} for calves, 341
Influence on protein requirements of growing-fattening swine, 221
Penicillin and streptomycin effects upon growth rate and bacterial count in the feces of pigs, 474
Penicillin, supplement to a corn- degossypolized cottonseed meal ration for weanling pigs, 465
Use in treatment of swine dysentery, 282

B

Bacteriology—
Techniques employed in cultural investigations of bovine rumen contents, 536
Benzene hexachloride—
Effect on pork flavor, 491
Birth weight—
Of beef cattle, 34
Breeding—
Inbred and non-inbred boars compared, 134
Breeding season—
Activity of pituitary gland in relation to breeding season of sheep, 646

C

Carcass—
Measuring the proportion of fat and lean tissue in swine, 319
Method of measuring of fatness and value on live hogs, 313
Carotene—
Stability in mixed feeds, 72
Cattle—
Absorption and tissue distribution of radio-calcium, 524
Alleviation of cobalt toxicity in calves by methionine administration, 326
Balancing nutritional deficiencies of roughages for steers, 501
Causes of bovine metestrous bleeding, 346
Digestibility of ground alfalfa for dairy heifers, 688
Effect of fattening on connective tissues of aged cows, 385
Effects of temperature and humidity on acclimation, 50
Electrocardiograms when fed thyroprotein, 693
Feed supplement containing aureomycin and B_{12} for calves, 341
Fertility of cows inseminated at various intervals after calving, 355
Head form as studied by a profilometer, 700
Heritability of beef grade and type, 361
Influence of fat and energy in the ration, 705
Mineral content of feeds used in north central Kansas. 516

SUBJECT INDEX FOR VOLUME 11

A

Acclimation—
Effects of temperature and humidity in cattle, 50
Adaptation—
Of baby pigs to temperature, 118
Amino acids—
Lysine, methionine and fish solubles, supplement to a corn-degossypolized cottonseed meal ration for weanling pigs, 465
Methionine supplement to low-protein and urea rations for lambs, 572
Methionine supplement to soybean oil meal for weanling pigs, 459
Utilization of D-tryptophan, 712
Antibiotics—
Aureomycin concentrate, effect on unthrifty weanling pigs, 92
Aureomycin, streptomycin effect on growth and fattening of weanling pigs, 103
Aureomycin, streptomycin growth responses in 2-day-old pigs, 97
Aureomycin supplement to lamb fattening rations, 566
Bacitracin and aureomycin growing-fattening pigs, 84
Effect on growth of baby pigs, 449
Effect on growth of swine when fed different levels of protein, 455
Feed supplement containing aureomycin and B_{12} for calves, 341
Influence on protein requirements of growing-fattening swine, 221
Penicillin and streptomycin effects upon growth rate and bacterial count in the feces of pigs, 474
Penicillin, supplement to a corn- degossypolized cottonseed meal ration for weanling pigs, 465
Use in treatment of swine dysentery, 282

B

Bacteriology—
Techniques employed in cultural investigations of bovine rumen contents, 536
Benzene hexachloride—
Effect on pork flavor, 491
Birth weight—
Of beef cattle, 34
Breeding—
Inbred and non-inbred boars compared, 134
Breeding season—
Activity of pituitary gland in relation to breeding season of sheep, 646

C

Carcass—
Measuring the proportion of fat and lean tissue in swine, 319
Method of measuring of fatness and value on live hogs, 313
Carotene—
Stability in mixed feeds, 72
Cattle—
Absorption and tissue distribution of radio-calcium, 524
Alleviation of cobalt toxicity in calves by methionine administration, 326
Balancing nutritional deficiencies of roughages for steers, 501
Causes of bovine metestrous bleeding, 346
Digestibility of ground alfalfa for dairy heifers, 688
Effect of fattening on connective tissues of aged cows, 385
Effects of temperature and humidity on acclimation, 50
Electrocardiograms when fed thyroprotein, 693
Feed supplement containing aureomycin and B_{12} for calves, 341
Fertility of cows inseminated at various intervals after calving, 355
Head form as studied by a profilometer, 700
Heritability of beef grade and type, 361
Influence of fat and energy in the ration, 705
Mineral content of feeds used in north central Kansas. 516

Respiration apparatus for C^{14} studies, 61
Seasonal variations in feed and water intake, 42
Serum alkaline phosphatase activity in cows on winter wheat pasture, 560
Techniques employed in cultural investigations of the bacteriology of rumen contents, 536
Vitamin B_{12} deficiency in the calf, 332
Cattle, beef—
Factors affecting gestation length and birth weight, 34
Feedlot and carcass characteristics of compress and conventional type Hereford steers, 17
Growth and development of Herefords, 3
Hay consumption in different types of Hereford cows, 26
Relationships of measurements of live animals to weights of wholesale cuts, 370
Chromic oxide—
Use in swine digestibility studies, 261
Cobalt toxicity—
Alleviated in calves by methionine administration, 326
Creosote bush—
Development of a processed feed and its nutritive value, 174
Crude fiber—
Utilization by swine, 480

D

Dairy heifers—
Digestibility of ground alfalfa for, 688
Digestibility—
Of range plants for sheep, 578
Of coarsely and finely ground alfalfa for dairy heifers, 688
Organic matter, in forage as determined by fecal nitrogen, 496
Prediction for feeds from composition, 77
Studies with pigs using chromic oxide, 261
Digestion—
Of protein *in vitro* influenced by soybean forage extract, 422
Dry matter—
Fecal nitrogen as a measure of intake, 496
Dysentery—
Treatment with arsonic acids and antibiotics in swine, 282

E

Electrocardiogram—
Of cattle fed thyroprotein, 693
Energy level—
Influence of, in the ration upon feedlot performance and carcass composition of fattening steers, 705
Enzymes—
Phosphatase activity of blood serum of foals, 191

F

Fat—
Constants of sow's milk, 727
Fat level—
Influence of, in the ration upon feedlot performance and carcass composition of fattening steers, 705
Fattening—
Effect on connective tissue in aged cows, 385
Fertility—
Of cows inseminated at various intervals after calving, 355
Forages—
Comparative nutritive content of field and barn-cured alfalfa hay, 400
Determining nutritive value, 389
Rate of vitamin D formation in hay, 419
Soybean forage extracts influence on protein digestion, 422

G

Gestation length—
In beef cattle, 34
Growth—
Baby pigs, as affected by antibiotics, 449
Of Hereford cattle, 3
Of pigs when given penicillin and streptomycin, 474
Of swine fed different levels of protein as affected by terramycin, 455
Physiological causes of genetically different rates in swine, 292

H

Heritability—
Of grade and type of range beef cattle, 361
Hormones—
Effects of diethylstilbestrol, testosterone and progesterone on growth, fattening and certain carcass characteristics of Western lambs, 656
Horses—
Phosphorus content and phosphatase activity of blood serum of foals, 191

I

Isotopes—
Respiration apparatus for C^{14} studies in cows, 61

M

Meat—
Pork, flavor as affected by benzene hexachloride, 491
Metabolism—
Of carotenoid in swine affected by thyroid, 273
Methionine—
Administered to alleviate cobalt toxicity in calves, 326
Milk—
Sow's, content of fat, fat constants and phospholipid, 727
Minerals—
Absorption and tissue distribution of radiocalcium in cattle, 524
Content of certain cattle feeds used in north central Kansas, 516
For growing-fattening swine in dry lot, 112
Inorganic phosphorus content of blood serum of foals, 191

N

Nutritive value—
Of corn, affected by the drying temperature, 430
Of field-cured and barn-cured alfalfa hay compared, 400
Of forages, 389

P

Pasture—
Protein and vitamin supplements for pigs, 233
Phosphatase—
Alkaline, activity in serum of cows and ewes, 560
Phospholipid—
Contents of sow's milk, 727
Phosphorus—
Radioactive distribution among tissues when intravenously injected into sheep, 638
Pituitary gland—
Activity in relation to the breeding season of sheep, 646
Profilometer—
For studying head form of the bovine, 700
Protein—
Digestion *in vitro* influenced by soybean forage extracts, 422
Levels of, as affecting action of terramycin on growth of swine, 455
Relation to pantothenic acid and vitamin B_{12} in the growing pig, 238
Requirements of growing-fattening swine as influenced by an antibiotic, 221
Supplements for growing-fattening pigs, 233
Protein level—
Effects on lamb production of mature ewe, 166
Effects on wool production in mature ewe, 156

R

Range—
Nutrition techniques, 181
Respiration—
Apparatus for C^{14} studies in cows, 61
Roughage—
Balancing its nutritional deficiencies for beef steers, 501
Rumen—
Techniques for cultural investigations of contents, 536

S

Selection—
In 2 inbred lines of swine for fertility, 301
Sheep—
Cobalt metabolism studies, 428
Determining the digestibility and metabolizable energy of winter range plants by sheep, 578

Distribution of intravenously injected radioactive phophorus (P_{32}) among tissues, 638
Effect of the corn-alfalfa hay ratio on the digestibility of the different nutrients, 424
Effects of diethylstilbestrol, testosterone and progesterone on growth, fattening and certain carcass characteristics of Western lambs, 656
Effect of vitamin E deficiency in the lamb, 609
Fattening lambs, rations supplemented with aureomycin, 566
Histological study of the development of the testis of the ram, 674
Methionine supplement to low-protein and urea rations for lambs, 572
Pituitary activity in relation to the breeding season of sheep, 646
Ration factors affecting utilization of urea nitrogen by lambs, 621
Serum alkaline phosphatase activity in ewes on winter pasture, 560
Wool fiber measurement, 631
Wool pigmentation as affected by nutrition, 599
Wool characteristics of the Ossimi sheep, 591

Spermatozoa—
Nature of a substance in, which stimulates yeast, 545

Stilbestrol—
Implants in swine of different sexes, 251

Swine—
A method for measuring the proportion of fat and lean tissue in carcasses, 319
Aureomycin and vitamin B_{12} effects on growth rate of unthrifty weanling pigs, 92
Baby pig's growth as affected by antibiotics, 449
Bacitracin and aureomycin in growth and fattening, 84
Comparison of feeds as sources of provitamin A, 721
Digestibility studies using chromic oxide, 261
Effect of benzene hexachloride on flavor of pork, 491
Effect of stilbestrol implants on different sexes, 251
Effect of thyroid on carotenoid metabolism, 273
Fat, fat constants of sow's milk, 727
Growth and bacterial count in feces of pigs affected by penicillin and streptomycin, 474
Growth and fattening of weanling pigs affected by antibiotics and vitamins, 103
Growth on different levels of protein as affected by terramycin, 455
Growth response to antibiotics, crude APF and vitamin B_{12} in 2-day-old pigs, 97
Heterosis in crosses of inbred lines of Duroc swine, 505
Inbred and non-inbred boars compared, 134
Mechanical measure of fat and carcass value on live hogs, 313
Methionine as a supplement to soybean oil meal for weanling pigs, 459
Minimum requirement of young pigs for a purified source of carotene, 266
Physiological causes of genetically different swine growth rates, 292
Protein and vitamin supplements for growing-fattening pigs on ladino clover and alfalfa, 233
Protein requirements as influenced by an antibiotic, 221
Relation of protein to pantothenic acid and vitamin B_{12}, 238
Riboflavin deficiency in baby pigs, 244
Selection for fertility in two inbred lines, 301
Temperature adaptation in baby pigs, 118
Trace minerals for growing-fattening in dry lot, 112
Treatment of dysentery with arsonic acids and antibiotics, 282
Utilization of certain cellulosic materials, 480
Utilization of D-tryptophan, 712
Weanling pigs fed a corn-degossypolized cottonseed meal ration supplemented with penicillin, lysine, methionine, and fish solubles, 465

T

Temperature—
Effect on nutritive value and commercial grade of corn, 430
Testes—
Histological study of development in the ram, 674
Thyroid—
Effects on carotenoid metabolism in swine, 273
Type—
And growth in Hereford steers, 17
And hay consumption in Hereford cows, 26

U

Urea—
Nitrogen, utilized by lambs as affected by ration factors, 621

V

Vitamins—
B_{12} concentrate effect on unthrifty weanling pigs, 92
B_{12} deficiency in the calf, 332
B_{12} effect on growth and fattening of weanling pigs, 103
B_{12} effect on growth of 2-day-old pigs, 97
Carotene requirement for young pigs, 266
Comparison of feeds as a source of provitamin A for swine, 721
Effects of A and D on wool pigmentation, 599
Effect of vitamin E deficiency in the lamb, 609
Feed supplement containing aureomycin and B_{12} for calves, 341
Pantothenic acid and vitamin B_{12} related to protein in the growing pig, 238
Rate of vitamin D formation in hay, 419
Riboflavin deficiency in baby pigs, 244
Supplements for growing-fattening pigs, 233

W

Wool—
Characteristics of, in Ossimi sheep, 591
Fiber measurements, 631
Production affected by level of protein in ration, 156
